data for a diverse and equitable future

clarifications.

*This organizational chart depicts the basic flow of funds and services from the federal to the local level. It does not depict all the potential pathways and interactions between various grantees, programs and service delivery models within Head Start. For example, an agency may be awarded separate grants to run an Early Head Start program and a Migrant and Seasonal Head Start program.

¹ Head Start services in combination settings are provided to children in both a center setting as well as through intensive work with the child's parents and family at home.
